

SONATA may cause serious side effects including complex sleep behaviors that may cause serious injury and death. After taking SONATA, you may get up out of bed while not being fully awake and do an activity that you do not know you are doing (complex sleep behaviors). The next morning, you may not remember that you did anything during the night. These activities may occur with SONATA whether or not you drink alcohol or take other medicines that make you sleepy.

Reported activities include:

- driving a car ("sleep-driving")
- making and eating food
- talking on the phone
- having sex
- sleep-walking

Important:

1. Take SONATA exactly as prescribed

- Do not take more SONATA than prescribed.
- Take SONATA right before you get in bed, not sooner.

2. Do not take SONATA if you:

- have ever experienced a complex sleep behavior (such as driving a car, making and eating food, talking on the phone or having sex, while not fully awake) after taking SONATA
- drink alcohol
- take other medicines that can make you sleepy. Talk to your doctor about all of your medicines. Your doctor will tell you if you can take SONATA with your other medicines
- cannot get a full night's sleep

3. Stop taking SONATA and call your doctor right away if you find out that you have done any of the above activities after taking SONATA.
